INDEX TO VOLUME 84

SUBJECTS

PAGE

Absolute-Magnitude Distributions, with Application to the Early K Stars, An Improved Method of Determining. *Gustaf Strömberg* 412
Absorption Lines, Intensities of Blended. *A. D. Thackeray* 433
Absorption Lines, Note on Equivalent Breadths of. *J. G. Baker* . . . 474
Absorption Lines, The Theoretical Interpretation of Equivalent Breadths of. *Donald H. Menzel* 462
Atomic Synthesis and Stellar Energy. III. *R. d'E. Atkinson* 73
Binary of Large Parallax, A New. *G. P. Kuiper* 478
Capella H, Confirmation of the Duplicity of. *G. P. Kuiper* 359
Carbon in the Spectra of Novae, Lines of Neutral Oxygen and. *Dean B. McLaughlin* 104
γ Cassiopeiae, Recent Changes in the Spectrum of. *Dean B. McLaughlin* 235
Colors of Globular Clusters, Absorption and Space Reddening in the Galaxy from the. *Joel Stebbins and A. E. Whitford* 132
P Cygni, Variations in the Spectrum of. *O. C. Wilson* 296
Globular Clusters, Absorption and Space Reddening in the Galaxy from the Colors of. *Joel Stebbins and A. E. Whitford* 132
H_2 from λ 3612 to λ 4224, Wave-Lengths of the Spectrum of. *Norton A. Kent* 585
Mean Parallaxes, Mean Absolute Magnitudes, and Mean Distances for Groups of Stars from Components of the Proper Motions, Computation of. *Gustaf Strömberg* 555
Meteorites, A Spectroscopic Examination of. *Arthur S. King* . . . 507
Milky Way, The Age of the. *Henri Mineur* 113
Multiplet Strengths for Transitions Involving Equivalent Electrons. *Donald H. Menzel and Leo Goldberg* 1
Multiplet Strengths, Note on Absolute. *Leo Goldberg* 11
Nebula NGC 7023, Photometry of the Diffuse. *Philip C. Keenan* . . 600
Nebulae, Effects of Red Shifts on the Distribution of. *Edwin Hubble* . 517
Nebulae. I. The Luminosity Function of Resolved Nebulae as Indicated by Their Brightest Stars, The Luminosity Function of. *Edwin Hubble* 158
Nebulae. II. The Luminosity Function as Indicated by Residuals in Velocity-Magnitude Relations, The Luminosity Function of. *Edwin Hubble* 270
Nebulae, On the Polarization of Light in Reflection. *L. G. Heyney* . . 609
Nebulae, Reflection. *Otto Struve, C. T. Elvey, and F. E. Roach* . . . 219

PAGE

Nebulae, Scattering of Light in Diffuse. *Otto Struve and Helen Story* . 203
Nova Herculis 1934, April–November, 1935, Spectrum of. *Walter S. Adams and Alfred H. Joy* 14
25 Orionis, A Study of the Spectrum of. *Helen W. Dodson* 180
Oxygen and Carbon in the Spectra of Novae, Lines of Neutral. *Dean B. McLaughlin* 104
Parallaxes with the 60- and 100-Inch Reflectors. Fifteenth Series. The Photographic Determination of Stellar. *Adriaan van Maanen* . . 409
φ Persei, A Spectrographic Study of. *Herbert F. Schiefer* 568
Photoelectric Photometry at the Sproul Observatory. *John S. Hall* . . 369
Photographic Photometry. *Frank E. Ross* 241
Polaris, The System of. *B. P. Gerasimovič* 229
Polarization of Light in Reflection Nebulae, On the. *L. G. Heyney* . . 609
Prominences of the Eruptive and Sun-Spot Types, The Motions of. *Edison Pettit* 319
Reviews:
Eberhard, G.; A. Kohlschütter; and H. Ludendorff (eds.). *Handbuch der Astrophysik*, Vol. VII (Otto Struve) 111
Heitler, W. *The Quantum Theory of Radiation* (Carl Eckhart) . . 239
Labérenne, Paul. *L'origine des mondes* (Otto Struve) 367
Moulton, F. R. *Consider the Heavens* (Philip Fox) 363
Sarton, George (ed.). *Osiris*, Vol. I (Otto Struve) 112
Sponer, H. *Molekülspectren* (David M. Dennison) 362
Stokley, James. *Stars and Telescopes* (O. C. Collins) 366
Samarium, Analysis of the Spectrum of Singly Ionized. *Walter Albertson* 26
Solar Velocity with Increasing Distances of the Stars from the Galactic Plane, The Change of the. *Emma T. R. Williams* 346
Spectra of Red Stars, Low-Dispersion. *Rupert Wildt* 303
Spectroscopic Binaries, A Rediscussion of the Orbits of Seventy-seven. *W. J. Luyten* 85
Temperature Scale, The Stellar. *A Pannekoek* 481
Visual Binaries of Large Parallax, Notes on. *G. P. Kuiper* 359
Wave-Length of a Spectral Line, Constancy of. *Guy C. Omer, Jr., and James L. Lawson* 477

INDEX TO VOLUME 84
